

Initial Screening of Manuscripts

Following the search strategy described in the [PROSPERO documentation](#). Searches were done on PubMed, EMBASE, Cochrane (CENTRAL, and CINAHL), and Web of Science with bib files saved. These were imported into Zotero (XXX total references) and de-duplicated to YYY references.

Raw Files

- PubMed: pubmed-serumcalci-set (583 records)
- EMBASE: records.ris (1209 records)
- Cochrane CENTRAL: citation-export.txt (218 records)
- Cochrane CINAHL: ae563724-ae52-4a0f-b528-4bc02b1205ad.bib (1100 records)
- Web of Science: savedrecs.ris and savedrecs (1).ris (1021 records, had to download in two parts)
<https://www.webofscience.com/wos/woscc/summary/55f88581-4004-40e7-9bdb-1cfb392fbddf-0179f0d203/relevance/1>

Notes:

- DB indicates Dave Bridges under screener
- [] around a paper indicates it was translated by PubMed from a different initial language
- If a paper is excluded for multiple reasons, they are separated by a ";"

Deep Screening of Manuscripts
